ABOUT ME

Dedicated Data Science & AI/ML learner with hands-on project experience in data analysis, machine learning, and development. Skilled in Python, SQL, and visualization tools to build predictive models and extract actionable insights. Passionate about applying AI-driven solutions to real-world problems and contributing to innovative, data-powered team success.

EDUCATION

Bachelor of Engineering, CSE(Data Science)-8.45 CGPA | PES College of Engineering, Mandya | 2023-2027
CBSE-12th(PCM)-86.2% | CHINMAYA VIDYALAYA , BOKARO | 2023
CBSE-10th-93.4% | CHINMAYA VIDYALAYA , BOKARO | 2021

SKILLS

Programming Languages: C, C++, Java, Python, SQL
Web Development: HTML, CSS, JavaScript,MySQL
Data Science & Analysis: Pandas, NumPy, Matplotlib, Seaborn,Scikit-learn
NLP & AI: spaCy, NLTK, Sentence Transformers, Embeddings, Cosine Similarity
DevOps & Other Tools: Git and GitHub,Chrome Extension

PROJECTS

JAN SAATHI

[DEMO LINK](#)

Tech Stack: React.js, Django REST, MongoDB, JWT, Google Maps API, Vertex AI

- Built a full-stack civic issue reporting platform with role-based access (Citizen, Admin, Contractor) and secure JWT authentication.
- Integrated Google Maps API and AI-based image classification (Vertex AI) for automatic issue detection, smart routing, and priority handling.
- Developed RESTful APIs and analytics dashboard to enable real-time tracking, performance monitoring, and data-driven decision making.

AI-Driven Resume Intelligence & Skill Gap Analysis System

[DEMO LINK](#)

[GitHub](#)

Tech Stack: Python, Streamlit, Sentence Transformers (all-MiniLM-L6-v2), spaCy, NLTK

- Built an NLP pipeline to parse PDF/DOCX resumes and extract 200+ skills; implemented transformer-based semantic matching (cosine similarity) achieving ~90%+ alignment accuracy and 35% better precision than keyword baselines.
- Designed a weighted critical-skill ranking system to score and compare 50+ candidates per role, reducing manual screening effort by ~60%.
- Developed a real-time dashboard with automated skill-gap detection and AI recommendations (<2s inference), ensuring complete local data privacy.

Defence OSINT Intelligence Assistant- Real-Time Threat Detection Chrome Extension

[GitHub](#)

Tech Stack: JavaScript, Chrome Extension APIs, NLP-based Keyword Analysis, Custom Threat Scoring

- Built a modular Chrome extension that performs real-time web page analysis, detecting defence-related entities (countries, military assets, organizations) and classifying content into LOW/MEDIUM/HIGH threat levels using a weighted scoring algorithm (<1s latency).
- Automated intelligence extraction and visual entity highlighting, reducing manual defence-content scanning time by ~70% while providing explainable threat indicators and contextual summaries.

EXPERIENCE

XPro – Azure DevOps Initiative

[CERTIFICATE](#) [WRP-REPORT](#)

- Designed and deployed CI/CD pipelines in Azure DevOps using YAML, automating build and deployment workflows with secure service connections and branch-based triggers.
- Managed source control via Git & Azure Repos and followed Agile practices using Azure Boards to streamline SDLC and improve release efficiency.

Deloitte Australia Data Analytics Job Simulation on Forage

[CERTIFICATE](#)

- Completed a Deloitte job simulation involving data analysis and forensic technology
- Created a data dashboard using Tableau
- Used Excel to classify data and draw business conclusions

KEY ACHIEVEMENTS

- Winner of COLOSSUS 2.0 2025 Hackathon held in DR. B R Ambedkar Institute of Technology, BENGALURU
- Ranked Top 40 on the GeeksforGeeks Institution Leaderboard, Profile: [GeeksForGeeks](#)
- Member of college team for VTU Mysuru division inter-college football tournament
