PROFESSIONAL SUMMARY

Software developer and AI/ML engineer with experience building scalable, production-ready applications spanning full-stack development, data engineering, and machine learning. Skilled in designing REST APIs, automating ETL pipelines, and developing NLP and predictive ML systems using Python, React.js, FastAPI, PostgreSQL, and Docker. A collaborative team player and analytical problem-solver who thrives in Agile environments and enjoys turning complex data into impactful, real-world solutions.

TECHNICAL SKILLS

Languages: Python, C++, Java, SQL, JavaScript, HTML, CSS

Web & Backend: FastAPI, Django REST, React.js, Node.js, Fastify, Streamlit, REST APIs, WebSockets, JWT

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQLAlchemy, Prisma, Neon, Relational Databases, NoSQL, Database Design

Data & ML: Apache Airflow, ETL Pipelines, Pandas, NumPy, Scikit-learn, XGBoost, Random Forest, Feature Engineering, Recommendation Systems

NLP & AI: spaCy, NLTK, Sentence Transformers, Semantic Search, Embeddings, Vertex AI, Google Maps API

Cloud & Deployment: Docker, Containerization, Render, Vercel, Cloud Deployment, Git, CI/CD, Azure DevOps, YAML, Chrome Extension APIs

DSA: Arrays, Linked Lists, Trees, Graphs, Hashing, Dynamic Programming, Greedy — 200+ problems on LeetCode, GFG, HackerRank, Coding Ninjas

EXPERIENCE

XPro — Azure DevOps Initiative

DevOps / Software Engineering Intern

Bangalore, India

Aug 2025 – Oct 2025

- Designed and deployed CI/CD pipelines in Azure DevOps using YAML, automating build and release workflows with branch-based triggers, secure service connections, and environment-specific configurations.
- Implemented automated validation checks in CI/CD pipelines, improving deployment reliability and reducing manual verification effort.
- Managed source control via Git and Azure Repos; applied Agile methodology using Azure Boards to streamline SDLC and improve sprint release efficiency.

PROJECTS

Spotify Analytics & Popularity Prediction Platform

SINGHALOK28/spotify-analytics-platform | Live Demo

FastAPI, React.js, PostgreSQL, Apache Airflow, Scikit-learn, Docker, SQLAlchemy, JWT

- Engineered a data-intensive analytics platform managing 100K+ music records with 10+ REST APIs for search, recommendations, ML inference, and authentication; deployed via Containerization on Render and Vercel.
- Built Apache Airflow DAGs to automate ETL pipelines — extraction, transformation, validation, and PostgreSQL loading — cutting manual data processing by 90%+.
- Implemented ML popularity forecasting (Random Forest, XGBoost) and a cosine similarity recommendation engine performing real-time comparisons across 100K+ tracks.

AI Resume Intelligence & Skill Gap Analyzer

SINGHALOK28/AI-Resume-Screening-Skill-Gap-Analyzer | Live Demo

Python, Streamlit, Sentence Transformers (all-MiniLM-L6-v2), spaCy, NLTK

- Built an NLP resume intelligence system extracting 200+ skills from PDF/DOCX files via transformer-based semantic matching; achieved ~90% alignment accuracy — 35% higher than keyword methods.
- Developed a weighted skill-ranking and gap analysis engine evaluating 50+ candidates/role with <2s inference, reducing manual screening by ~60% via a real-time Streamlit dashboard.

JanSaathi — AI-Powered Civic Issue Management Platform

SINGHALOK28/jan-saathi | Live Demo

React.js, Django REST Framework, MongoDB, Vertex AI, Google Maps API, JWT

- Built a full-stack civic reporting platform with role-based access, JWT auth, and Google Maps integration for geospatial issue tracking across citizen, authority, and admin roles.
- Integrated Vertex AI image classification to automate issue detection and priority assignment; built real-time analytics dashboards for data-driven civic decision-making.

Defence OSINT Intelligence Assistant — Chrome Extension

SINGHALOK28/Intelligent-Surveillance-Hub

JavaScript, Chrome Extension APIs, NLP Keyword Analysis, Custom Threat Scoring

- Built a Chrome extension for real-time web content analysis, classifying threats (LOW / MEDIUM / HIGH) via a custom NLP scoring algorithm; reduced manual review time by ~70%.

EDUCATION

B.E. — Computer Science & Engineering (Data Science) | VTU

PES College of Engineering, Mandya | CGPA: 8.45/10

Mandya, Karnataka

2023 – 2027

ACHIEVEMENTS & CERTIFICATIONS

- Vice President** — DOT Club (Departmental Official Tech Club), PES College of Engineering, Mandya
- Winner** — COLOSSUS 2.0 Hackathon 2025, Dr. B R Ambedkar Institute of Technology, Bangalore
- Top 40** on GFG Institution Leaderboard (500+ students) | Azure DevOps CI/CD Certified — XPro WRP | VTU Inter-College Football Team Member
